Mr. Gerardo Rios  
U. S. EPA, Region IX  
Mail Stop A-5-2  
75 Hawthorne Street  
San Francisco, California 94105

Dear Mr. Rios:

Proposed De Minimus Revision to Title V Permit for SFPP, L.P. (ID# 800129)

Enclosed for your 45-day review is the proposed revision to the Title V Permit, as described below, for SFPP, L.P. located at 2359 Riverside Ave., Bloomington, CA. This revision is considered a "de minimus permit revision", and a public notice is not required.

We are enclosing the revised permits as shown below and the engineering evaluation.

Previous Appl. No.	New Appl. No.	Description
444971	458555	Tank C-35 (Increase thruput, add secondary seal, add withdrawal nozzle)
434077	481223	Tank C-5 (Increase denatured ethanol thruput, add inlet nozzle)
403345	482757	Tank C-39 (Replace vapor pressure limit with commodity description)
403344	482758	Tank C-40 (Replace vapor pressure limit with commodity description)
434765	496400	Ethanol Unloading Rack (Increase thruput, upgrade pump system)

The Initial Title V Permit for this facility was issued on February 10, 2009, and the most recent revision was issued April 23, 2009. Since then, the facility has requested modifications to existing equipment and has filed applications as described above. Although the modification to Tank C-5 will cause an emission increase of one pound per day of VOC, the proposed modifications as described above will result in an overall decrease of emissions of 7 pounds per day of VOC.

**We are requesting expedited review for this revision so that the equipment can be constructed prior to the beginning of January 2010 to meet CARB ethanol mandate.** This request is being made via electronic submittal in order to facilitate this review. If you have any questions or wish to provide comments regarding this project, please contact the processing engineer, Ms. Linda Dejbakhsh, at (909) 396-2614, or by email at [LDejbakhsh@aqmd.gov](mailto:LDejbakhsh@aqmd.gov).

Very truly yours,

Jay Chen, P.E.
