
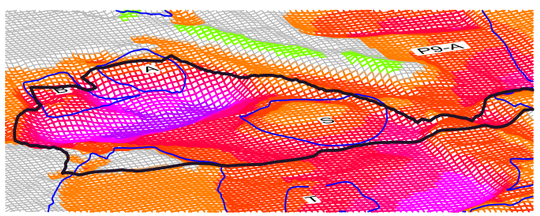
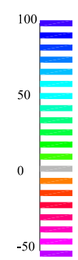
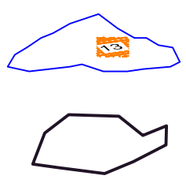
South Borrow Area (same scale as main map)



Note: South Borrow Area reflects 1987 vs. 2002 topography

Vertical color scale
(feet of cut or fill)





Historical pond outline with label (some distortion due to draping on irregular cut-fill surface)

South Borrow Area

Existing cap extent

Note: this is an oblique view, not a perspective view: therefore nearer objects occupy the same amount of space on the page as more distant objects, and the scale is accurate throughout the displayed area.

Grid mesh cells are 10' by 10'.

Vertical resolution is approximately 10 feet, and any areas indicated by '0' (gray) are +/- 10 feet. See Figure L-3, Cut-Fill Map, 1987 Versus 1998 Site Topography, for resolution to 2 feet.

Figure 2-53 is discussed in Section 2.2.3, Site History Review - Site Topographic Map Review.
