

**FIGURE 8-1  
CONCEPTUAL SITE MODEL: UNCAPPED AREAS \*  
BASELINE HUMAN HEALTH RISK ASSESSMENT**

GW: groundwater

(1) Onsite wells not used for Potable Water

(2) Sample results collected from offsite monitoring wells do not indicate a significant impact

■ Potentially complete pathway will be quantitatively evaluated

▨ Insignificant pathway: an exposure estimated to be 2 or more orders of magnitude less than by other pathways (for the same receptor), or if the likelihood of exposure by that pathway is very small (USEPA, 1989)

□ Incomplete Pathway

\* Including Pond 18 and Pond A-5 Sediments assuming liquids are drained
