

**TABLE ES-3  
RISK DRIVERS<sup>[1]</sup> IN SEDIMENT**

<b>Exposure Area</b>	<b>Based on Aquatic Wildlife and Sediment Invertebrates</b>		<b>Human Health</b>
	<b>Tier 1 ERA</b>	<b>Tier 2 ERA</b>	
A-Series Pond	Cadmium, Chromium, Manganese, Nickel, Selenium, and Vanadium	--	None
RCF Pond	Barium, Acetone, 1,1-Dichloroethane, and MCPP	--	None
Pond A-5	1,1-Dichloroethane, Barium, Cadmium, Nickel, Selenium, and MCPP	--	None
Pond 13	Nickel	--	None
Pond 18	Cadmium, Nickel, Selenium, and MCPP	--	None

-- Exposure area not evaluated in the Tier 2 ERA.

[1] = No Tier 2 risk drivers were identified for sediment as all of the ponds will have presumptive remedies in place as part of the USEPA-approved closure plan for the site and will be backfilled/graded to prevent accumulation of water, they will be unavailable as a pathway for aquatic receptors, essentially eliminating the potential for adverse effects to aquatic receptors. Presumptive remedies for all onsite ponds will be further detailed as part of the FS process.
