

Issues and Recommendations

<i>Issue</i>	<i>Recommendation and Follow-up Action</i>	<i>Responsible Party</i>	<i>Oversight Agency</i>	<i>Date</i>	<i>Affects Protectiveness (Yes/No)</i>
Degradation of residual VOCs is occurring very slowly. Other remedial options should be considered to accelerate degradation to achieve cleanup objectives.	Applied Materials should evaluate the feasibility of alternative remedies such as in-situ bioremediation in terms of accelerating degradation to achieve cleanup objectives.	Applied Materials, Inc.	RWQCB	Sept. 2007	Short-term:No Long-term:No
Further information is needed to determine that the deed restrictions are in place and properly recorded.	Verify record date and location of the deed restriction in the next Five Year Review.	Applied Materials, Inc.	RWQCB	February 2006	Short-term:No Long-term:No
