

**FIGURE T-3
CONCEPTUAL SITE MODEL: SURFACE WATER
BASELINE HUMAN HEALTH RISK ASSESSMENT**

(1) The Site is currently a zero discharge facility

■ Potentially complete pathway will be quantitatively evaluated

▨ Insignificant pathway: an exposure estimated to be 2 or more orders of magnitude less than by other pathways (for the same receptor), or if the likelihood of exposure by that pathway is very small (USEPA, 1989)

□ Incomplete Pathway
