

**2006 REPORT  
SAN FERNANDO VALLEY SUPERFUND SITES  
GROUNDWATER MONITORING PROGRAM**

**SAN FERNANDO VALLEY  
LOS ANGELES COUNTY, CALIFORNIA**

**Figure 3-7**

**United States Environmental Protection Agency**

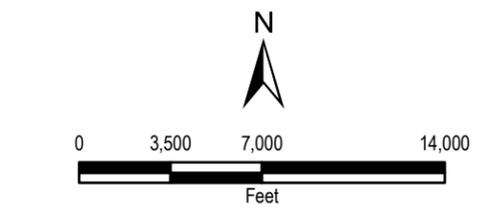

**December 2007**

- LEGEND**
- Wells Sampled 2000 or Later
  - △ Wells Sampled Before 2000
  - OU Extraction Wells
  - Treatment Plant
  - - - Municipal Boundary
  - Orange shaded area Above 45 mg/L (MCL)

**NOTES:**

1. The areas of contamination shown on this map represent generalized two-dimensional approximations based on water quality analysis from RI Monitoring Wells, Facility Wells, and Production Wells where the top of screened interval is greater than 50 feet below the top of the water table.
2. Due to the possible vertical zonation of contamination, a well within an identified area of contamination may produce water with contamination different than that indicated on this map.
3. Areas of contamination are based on the most recent record available for wells sampled.
4. Areas outside the colored area of contamination represented on this map may also be contaminated. However, the most recent data available from wells located outside the colored area of contamination on this map are below the MCL of 45 mg/L.
5. The original figure is produced in color. Significant information is lost if copied in black and white.
