

# Motorola 52<sup>nd</sup> Street Superfund Site

United States Environmental Protection Agency

Region 9

September 2001

## Comments Requested on Groundwater Study

### We Want Your Input

The U.S. Environmental Protection Agency has drafted plans to conduct additional work at the Motorola 52<sup>nd</sup> Street Superfund Site. We would like you to have an opportunity to learn about the work we are doing and to give us your input.

### What We Are Doing

The work we are doing is called a groundwater investigation. As part of this investigation, EPA is planning to install several groundwater monitoring wells throughout the Operable Unit Three Study Area of the Site, which is approximately between 20<sup>th</sup> Street and 7<sup>th</sup> Avenue, and McDowell and Buckeye Roads. The wells will allow us to collect information on the type and extent of groundwater contamination that is in the area, and help us better define where the boundaries of contamination are. We will also use this information to determine what additional study will be needed. The groundwater under investigation is not used for drinking water.

### The Groundwater Investigation Work Plan

Our plans are described in a document called the *Draft Groundwater Investigation Work Plan, Motorola 52<sup>nd</sup> Street Superfund Site, Operable Unit 3 Study Area*, dated August 6, 2001. This Plan is available at the locations listed below. Before finalizing the Draft Work Plan, the U.S. Environmen-

tal Protection Agency will consider all oral and written comments received during the public comment period.

You may review the Draft Groundwater Investigation Work Plan at the Site Information Repositories:

### INFORMATION CENTERS

Arizona Department of Environmental Quality  
3033 N. Central Avenue, 7<sup>th</sup> Floor  
Phoenix, AZ 85012  
Please call for an appointment
