

[Source: Stringfellow Site Waste Transaction Summary Reports, National Enforcement Investigation Center, April 1988.]

The Ledger Data Report contains a summary of monthly waste transactions based on information contained in the site financial ledgers. Data from these ledgers was only included on the database if no daily transaction records were available for these monthly totals, in the time periods they occurred. This procedure was used to avoid "double counting" any waste transactions.

This database is named "SF3LEDGER2" and contains 378 records.

<b>Generator</b>	<b>Quantity (Gallons)</b>	<b>Percent Of Total</b>
Montrose Chemical Co.	2293500	45.8971
