Glossary

Background: Location of samples collected from an area not influenced by the Superfund site under investigation. The location of background samples should have the same basic characteristics as the media at the particular Superfund site under investigation. Background samples are often collected upgradient or upwind of a Superfund site.

Legend

-  Below SL
-  From SL to 10 x SL
-  From 10 x SL to 100 x SL
-  From 100 x SL to 1,000 x SL
-  From 1,000 x SL to 10,000 x SL
-  Greater than 10,000 x SL

Colors represent the highest concentration detected.

NA = Not Applicable

SL = Screening Levels

* Latest available sampling results: November 2006
