Construction

- No discussion.

Well Construction

- On the SixCENSE probe, because of a power supply problem, the manufacturer sent a whole new controller, which will be installed on 9 November by Davis. The plan is to have the final electrical inspection completed by next week.
- Bob and Adam are planning the monthly performance inspection on 16 November. Lana will check with Mike Lowe and/or Mike Garland to see if this date is okay and advise Adam.
- URS is still working on the Attachment A list for 19th Street and Encanto Park.
- Dave suspects that the cable going from the RTU at the GAC vessels and the pump room is bad. Davis will look at this as well. The ports on the RTUs are believed to be damaged from the electrical storm. ATSI's position is that it is not a warranty issue, but an act of God.
- Adam put on the punch list to ATSI that they need to confirm that MUNI is getting the signals they are suppose to get and that SBMWD gets the stop signal from MUNI.
