

Seminars on Sustainability Tools and Approaches Organized by the Office of Research and Development

Paul Anastas

Assistant Administrator for Research and Development

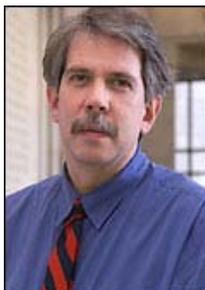

ORD is working to make sustainability the bedrock of our research activities. We are aiming to find innovative, creative, sustainable solutions to critically important issues that integrate environmental, societal and economic concerns. These seminars offered ideas and guidance on how best to move forward. I am pleased to acknowledge and thank each of the following speakers for assistance in helping ORD plan its future research activities.

June 8, 2010
