Re: The First External Draft of the SAB Integrated Nitrogen Committee is
now posted on the web

Hey Kathleen,
Thanks for the copy.

A couple of things caught my eye right off the bat.

Some recommendations are written as sentences and some as statements (but
in sentence format). I suggest that the recommendations be presented in a
uniform manner.

on page C1-7, line 39 -- How is "excess" defined and who makes that
definition? I think this is fairly important in this context.

page C3-22 -- The word "may" here is pretty equivocal. Maybe the authors
meant to say "should?"

Again, just a couple of things that caught my eye. I haven't read the
entire document.

Best,
Robbins
