Dear Dr. Henderson:

Thank you for providing me with the Clean Air Scientific Advisory Committee's consultative review of the U.S. Environmental Protection Agency's *Sulfur Dioxide Health Assessment Plan: Scope and Methods for Exposure and Risk Assessment (November 2007 Draft)*. The Panel's consultation and comments have been extremely helpful to me and my staff as we prepare to conduct the exposure and risk assessment for this review.

I thank the Panel again for its excellent work and will continue to consider its advice and recommendations carefully as we move forward with the review of the primary National Ambient Air Quality Standards for sulfur dioxide.

Sincerely,
