Subject: FW: Methane Concentration in groundwater wells from August 26, 2013

Attached is an email message from researchers at Duke University who have been sampling water wells in Parker County including a water well owned by Mr. Steve Lipsky that appears to be contaminated with methane from an HVHF horizontal well in the vicinity beneath this water well. This submission is on behalf of Mr. Lipsky and Damascus Citizens for Sustainability and NYH2O.

Hi Steve,

I hope all is well for you.

Please find below the methane concentrations from your groundwater wells collected on our August 26 sampling trip. Samples were collected by Rob Jackson and Tom Darrah.

Lipsky-1 (old well): [CH₄]=71.5 cc/L

Kind regards,

Tom
