

Mr. Edward Hanlon
Science Advisory Board Staff Office
US Environmental Protection Agency
(Mailcode 1400R)
1200 Pennsylvania Ave., NW
Washington, DC 20460-4164

Dear Mr. Hanlon:

I request that you include me as a stakeholder in the study of the "Potential Impacts of Hydraulic Fracturing on Drinking Water Resources." I am a stakeholder because of my (or a family member's) association with Texas and/or the industry in one or more of the following ways:

- * As a landowner with oil and natural gas mineral rights in Texas
- * As an employee of an oil or natural gas exploration or production firm
- * As a shareholder with a financial interest in an oil or natural gas exploration or production company; and/or
- * As an owner of real estate in Texas

Future rules and regulations recommended by the advisory committee, if accepted by the EPA, could negatively impact the oil and natural gas industry in Texas. Regulatory action that fails to consider the economic effects of stopping or reducing hydraulic fracturing would jeopardize employment in that industry, reduce the value of my investments, and/or raise my property taxes since Texas (and many other states) currently receives significant severance taxes from oil and natural gas production.

As a stakeholder, I request that you consider these issues, and keep me updated on all future meetings and releases of any and all further reports or regulations of any kind considered and/or drafted by the advisory committee.

Signed,

Robert Brackbill

P.S. My 70 plus years as an active participant in the drilling and production sectors of the oil industry together with my extensive education in both engineering and geology provides me with much knowledge of the effect fracturing on the shallower fresh water reservoirs. I both hope and pray that your conclusion will be like mine. The chance of it happening is so slight that the job loss aspect alone of a negative decision provides much greater danger to our country's well being.
