Subject: Hydrofracking study stakeholders

Mr. Hanlon:

Our organization represents residents in rural Upstate NY, an area dependent on private and municipal wells for safe drinking water. As you can imagine, people are very concerned about the potential impacts of hydrofracking with thousands of acres of land already leased for drilling. Please consider us a "stakeholder" in the dialog about hydrofracking as we look forward to being active participants in the discussion.

Thank you.

Robert Nied
Co-Director
Schoharie Valley Watch
