Subject: Radiation on the or. Coast.....

I am living on the or. Coast &

since the 3xmelt down on Japan's coast, we have been living in very 'loud silence' from our government agencies.... Where are you? Where is our NEEDED INFORMATION? WHY THE SCIENCE? I am devastated.. All of us who live here know the radiation has been & continues to be a constant threat & has been deliberately as well as accidentally dumped into the Pacific Ocean & our environment, yet no one is giving us any recommendations, advice, honest reporting, warnings, or INFORMATION... ITS DIOABLOLICAL... As a citizen of the United States I demand your attention & your honesty.... Please let us know how to protect ourselves, what the real threat is & what we as a country intend to do to keep our citizens safe from this nuclear assault on our country, by Japan. We as a nation must demand Japan focus all of its efforts to stop the radiation NOW. A CALL TO ALL NATIONS FOR HELP is essential. I am mad as hell at our own gov. For its silence... We are humans living in harm's way, yet the defence budget is not finding its way to our shores, where we face a much greater threat to America from Japan than any other place on this planet.. Why is our gov. Ignoring the problem & what will you do to protect me, my family & our west coast? Louise Nelson, citizen & scared..
