Dear Dr. Swackhamer and Dr. Milford:

Thank you and the other members of the Risk and Technology Review Methods Review Panel for sharing your thoughts on the draft "Risk and Technology Review Risk Assessment Methodologies: For Review by the EPA's Science Advisory Board with Case Studies – MACT I Petroleum Refining Sources and Portland Cement Manufacturing."

I am confident that the panel's comments will be a great help to me and my staff as we continue to refine our risk-assessment methodology approach. Our consideration of the panel's work will be reflected in forthcoming risk assessments to be performed to support our residual-risk rulemaking activities.

Again, please accept my appreciation for your efforts.

Sincerely,
