Below is my comments for public record.

FOR PUBLIC COMMENT  
Relative to SAB Hydraulic Fracturing Study Plan Review Meeting

In order for the EPA, its staff members and the public be properly informed, the EPA should require at least the following disclosures to be made by the Review Panel members on this study.

1. The employer of each member (Universities for professors) should disclose the following:
  - 1.1. Any and all donations from all O&G companies made during the last 10 years.
  - 1.2. Any interest in minerals, including income per year for the last 10 years. Also who donated these interest to the employer and/or if the interest is on employer owned lands.
2. Any mineral interests owned by the panel members during the last 10 years, and dollar amount of income derived from these interests whether received in money or to trusts.
3. Prior employment history of each panel for the last 20 years.
4. Each panel member should disclose any in-house review organizations through which official documents went through.
5. Any communications with any O&G companies relative to input or review of documents/information for this review at the EPA.

The public should be made aware of any and all influence/s from O&G operators that may be present on this panel and it's members.
