Subject: My comments for the EPA study

6-24-13

Mr. Hanlon:

Please include my comments about Dimock and our Susquehanna County, Pa., that were attached to Betty Tatham's comments to the EPA.

Please see and add the attached list of DEP Determination Letters, I acquired via Right to Know , showing that "gas drilling as impacted" private , water supplies. I am attaching a link that contains list of over 40 DEP Determination Letters;

<http://www.damascuscitizensforsustainability.org/pa-dep-determination-letters/>

I have ordered more DEP Determination letters from about 9 more counties and DEP has more than 237 more such letters showing impacts to water supplies from gas drilling.

These letters are not on the DEP site for easy-public perusal. This needs to change and more transparency and ease of access for the public to know of the deleterious impacts to our environment and health from gas drilling. These Determination Letters are hidden away in files in DEP possession and we are just finding out about them and acquiring them, years after many have happened.

Meanwhile, the Gas Industry insists that "fracking" is not polluting the Commonwealth Waters, but "gas drilling" is and whatever part of the process that may mean.

Thank you for your help with what I am submitting,

Vera Scroggins
