Subject: Fracing and water

Hello Edward,

I am a landowner in Fayette County, PA with gas wells that were drilled within the last 12 years.

I have had:

- four Upper Devonian wells drilled
- one vertical Marcellus well drilled
- two horizontal Marcellus wells drilled

My property is completely surrounded by Upper Devonian shallow wells and Marcellus wells.

I have had NO impact on my water from all the drilling.

Before and after water tests were identical.

Respectfully,

Dave Szuhay
