

Duvall Cover Note for Suggestion 3-7 March 9, 2008

Dear Jack and Jan:

Attached is a revision of Suggestion 3-7. Respectfully, I do not believe that this comment is excerpted by Suggestion 3-1. I have revised the pertinent comment in an effort to clarify its importance.

Suggestion 3-7 Duvall030908

SUGGESTION 3-7: Step 4 of the Data Quality Objectives (DQO) process, which is fundamental to the MARSAME, is to “Define the Boundaries of the Study”. The Roadmap should ensure that the primary components of the process are identified, their relationship to one another depicted, and that the boundaries of their application are well-defined to the reader. It is important for the reader to be able to put its “arms around the process” by visualizing the full extent of the process on one page of the Roadmap. The example provided illustrates this suggestion and meets the intent of the comment.
