Subject: Raising Radiation Levels

Dear Mr. Hanlon,

As I understand it, your job, first and foremost, is to PROTECT the public. Why, oh why, then would you even consider raising the current acceptable radiation levels?

Cancer is rampant, heart disease is rampant, diabetes is rampant..... these statistics alone suggest that you all may be abjectly failing at your jobs..... and now, to RAISE the acceptable levels of radiation? Why sir, it seems you should be LOWERING them if anything!

Many are aware of the ongoing Fukushima event and its devastating effect on the Pacific ocean. I would like to remind you that your probity is in question here and that, regardless of what you may think, you are certainly held accountable by a much higher power of us all to do the right thing!

Thank you for allowing me to voice my opinion.

Best regards,

Carol Younce,  
Marion, North Carolina
