Subject: RE: SO2 NAAQS review: CASAC request for data
Attachments: Tulsa_Ambient_Data.xlsx; Indianapolis_Ambient_Data.xlsx

Aaron,

Here is the data to fulfil the request by one of the CASAC SOx panel members regarding the hourly and 5-minute ambient concentration data available for Indianapolis and Tulsa that were used in the draft SO2 REA (section 3.5).

The attached files contain the following:

- *Indianapolis_Ambient_Data.xlsx* - Hourly average (hour_avg) and maximum 5-minute (max_5min) SO2 concentrations observed for 2011, 2012, 2013 at monitors 180970057 and 180970078 in the Indianapolis study area; and
- *Tulsa_Ambient_data.xlsx* – Hourly average (hour_avg) and Continuous 5-minute concentrations (conc5) during 2011-2013 at monitors 401430175, 401430235, and 401431127 and during 2013 at monitor 401430179 in the Tulsa Study area.

Please let us know if there are any questions. Thanks.
